DETAILED ACTION

Response to Amendment

1. Applicant's submittal of an amendment was received on January 21, 2005, wherein claims 1, 12 and 20 were amended and new claims 23-25 were added.

Allowable Subject Matter

2. Claims 1-25 are allowed over the prior art.
3. The following is an examiner's statement of reasons for allowance: In regards to claims 1 and 23-24, Examiner agrees that the prior art, including Gress ('132) and Kahle ('856), does not teach "whereby the second structural member bottom end is translated *towards* the first structural bottom end for providing a compact collapsed stand." Examiner agrees that Gress, in contrast to the present invention, discloses wherein the second structural member bottom end is translated away from the first structural member bottom end for collapsing the stand as shown in Figures 2-3.

In regards to claim 20, claim 20 is essentially allowable over Gress for the same reason, because claim 20 requires "translating an upper portion of a slidable structural member towards an upper portion of a pivotal structural member" as the stand is collapsed. Gress's stand has the upper portion of the slidable structural member translate away from the upper portion of the pivotal structural member.

In regards to claims 22 and 25, the prior art did not disclose a power tool assembly having a frame having longitudinal members with inboard facing channels formed therein, a

sliding member received within each channel, a first pair of legs displaced outboard of the frame and pivotally connected the first end of the frame, a second pair of legs disposed inboard of the frame and pivotally connected to the sliding members.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
